R-ZHFR-3205

Colorability:

R-ZHFR-3205 is available in natural color, but it is colourable compound with EVA/PE base color master batch.

Shipment:

R-ZHFR-3205 is supplied in the form of free-flowing granules in 25 kg moisture proof poly bags or 860 kg in octagon.

Processing Guidelines:

- R-ZHFR-3205 can be processed using low C/R screw instead of regular PE extruder. The actual temperature profile for extrusion will depend on the machine characteristics but the following can be taken as a guideline; Temperature Profile: 130-140-150-155-160-165°C.
- To obtain smooth and glossy cable surface, it is recommended for pre-drying at 70°C for 2 to 4 hours.

Storage and Handling:

- The material should be stored to prevent a direct exposure to sunlight and/or heat.
- The storage area should also be dry and preferably don't exceed 50°C. RTL would not give warranty to bad storage conditions which may lead to quality deterioration such as color change, bad smell and inadequate product performance.
- It is advisable to process goods within 1 year from the date of manufacturing.
