## **R-ZHFR-3506**

### **Colorability:**

R-ZHFR-3506 is available in natural color, but it is a colorable compound with EVA/PE base color master batch.

### **Shipment:**

R-ZHFR-3506 is supplied in the form of free-flowing granules in 25 kg moisture proof poly bags or 860 kg in octagon.

### **Processing Guidelines:**

- R-ZHFR-3506 can be processed using low C/R screw instead of regular PE screw extruder.
  The actual temperature profile for extrusion will depend on the machine characteristics
  but the following can be taken as a guideline; Temperature Profile: 135-145-155-160165°C.
- To obtain smooth and glossy cable surface, it is recommended for pre-drying at 70°C for 2 to 4 hours.

### **Storage and Handling:**

- The material should be stored to prevent a direct exposure to sunlight and/or heat.
- The storage area should also be dry and preferably don't exceed 50°C. RTL would not give warranty to bad storage conditions which may lead to quality deterioration such as color change, bad smell and inadequate product performance.
- It is advisable to process goods within 1 year from date of manufacturing.
